

Lars Scott

Peabody Energy

Lars is currently the Director of Coal Technology Development for Peabody Energy. He has been employed by Peabody for the last eight years. In his current role, Lars is responsible for understanding and developing technology for the continued and expanded use of coal in both power generation and coal-to-products applications such as gasification, synthetic natural gas production, liquefaction, and other technologies. Prior work assignments within Peabody include generation development, government affairs, market development, mining decision support and business development.

Lars holds Bachelor and Masters degrees in Civil Engineering from Kansas State University; and a Master of Business Administration in Finance from Indiana University.
