

## **Dan York**

### **American Council for an Energy Efficient Economy**

Dan York is a Senior Research Associate for the Utilities and Public Benefits Program of ACEEE. In this role Dan researches and analyzes issues dealing with energy efficiency policy and programs. Example projects include studies of energy efficiency program best practices, reviews of public benefits programs, and tracking of energy efficiency program trends.

Dan joined ACEEE in October of 2001 and came to ACEEE with over 15 years of experience in the energy efficiency field, including five years as a Senior Project Manager at the Energy Center of Wisconsin.

York has a bachelor's degree in mechanical engineering from the University of Minnesota. His M.S. and Ph.D. degrees are both in "Land Resources" from the University of Wisconsin-Madison, with an emphasis in "Energy Analysis and Policy." While a graduate student, York received a Fulbright Fellowship for researching energy planning and policy issues associated with Norway's restructured utility industry.
